

SEID 2016

DO NOT MISS THIS NEW EDUCATIONAL INITIATIVE

an exclusive benefit of **ERA-EDTA (cat. A, B and C.) members!**

ERA-EDTA is happy to announce the first **Scientific and Educational Interaction Day (SEID)** to be held on **October 26, 2019 in Vienna (Austria)**.

This event is designed to be a day of succinct **sessions focusing on clinical issues related to systemic diseases which affect the kidney** (from prevention to diagnosis). Part of the meeting is devoted to **vascular access including a practical session involving demonstrations of ultrasound scanning and fistula imaging on real patients**. Participants will have a chance to practise imaging under the supervision and guidance of experts.

Do not miss the Satellite **'New Drugs in Kidney Disease'** which is preceding the SEID on **October 25**. In this half-day symposium key European speakers will contribute in the sessions providing updates on recent studies related to the treatment of anaemia, hyperkalaemia and diabetes in CKD.

The Scientific and Educational Interaction Day (SEID) has been **accredited by the European Accreditation Council for Continuing Medical Education (EACCME®)** with **10 European CME credits (ECMEC®s)**. Each medical specialist should claim only those hours of credit that he/she actually spent in the educational activity.

Through an agreement between the Union Européenne des Médecins Spécialistes and the American Medical Association, physicians may convert EACCME® credits to an equivalent number of **AMA PRA Category 1 Credits™**. Information on the process to convert EACCME® credit to AMA credit can be found [here](#).
